Author: Roberts, Kris

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Release from a tank overflow was not contained. Followup is necessary.

Date: 5/29/2014 **Status:** Correspondence

Author: Espe, Brady

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

I inspected the site and did not see any discharge off pad. I contacted personnel from the company. They indicated that the produced water that overflowed didn't come from the frac tank but from the frac company's mixing unit just south of the frac tanks labeled as working tanks. No water ran off of site; that area actually had a depression due to traffic and rain prior to the frac. No further followup is required at this time.

Date: 5/29/2014 **Status:** Awaiting Documentation

Author: Espe, Brady

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Waiting on more information regarding the spill; could not tell where it occurred on pad.
